FOR IMMEDIATE RELEASE

SOCKET ENTERS THE LOCAL AND LONG-DISTANCE TELEPHONE MARKET IN WARRENSBURG, MISSOURI

WARRENSBURG, MO. — Socket Telecom, a new Missouri telephone service provider under the parent company Socket Holdings Corp., recently announced its entrance in the local and long-distance telephone service market for Warrensburg area businesses. Combined with partner company, Socket Internet, this announcement means business owners can choose to get both telephone service and Internet service from one local company, and marks a significant competitive shift in the Warrensburg, MO business telecommunications climate.

“Businesses with multiple telephone lines and bandwidth intensive applications are now able to choose to work with a different telephone company for their telecommunication needs, which is something businesses in the metropolitan cities of the state have been able to take advantage of for years,” said Carson Coffman, one of the company’s three owners and Vice-President of Sales and Marketing.

Socket Telecom’s local telephone service packages can be customized to include any of the most popular features such as Direct Inward Dial, Caller ID, Call Waiting, Voice Mail, Call Accounting, Remote Access and Call Forwarding. Customers choosing to switch to Socket can keep their telephone numbers and directory listings, and will have personal access to customer service representatives, engineers and company owners.

Socket Telecom has also recently entered the telephone market in other mid-Missouri business communities, including Jefferson City, Sedalia, Columbia, Fulton, Mexico, Kirksville, Hannibal, Moberly, Rolla, & Lake Ozark area.

Warrensburg businesses interested in receiving a free audit of their current telephone bills can call Socket at 429-6111 in Warrensburg, MO or toll-free at 1-800-SOCKET-3. Or visit www.socket.net for more information.
